MEMORANDUM FOR: Management Staff

SUBJECT : Evaluation of VICTOR Automatic Printing Calculator
MODEL 75-85-54

1. I used the subject machine in the process of performing the daily duties of my office for approximately three weeks.
2. Having used the Remington Rand printing calculator exclusively for the past five months, it took a short while to get the feel of the keys. However, having accustomed myself to the machine, I found it to be fast and efficient in operation.
3. In comparison, I found the VICTOR machine simpler, as well as faster, to operate in the performance of multiplication and division problems and no simpler but faster in performing addition and subtraction problems.
4. Aside from the difference in cost of the two above mentioned calculators, which I understand is considerable, I recommend that the Agency commence purchasing subject machine as the need for new machines arises.
